

Workshop

Insurance Standardisation Project to implement the EU Regulation on Financial Data Access

Online | 15 January 2025 | 10:00 - 13:00 CET

Objectives

EU Commission announced a proposal for an EU Regulation on a Framework for Financial Data Access (FIDA).

FIDA postulates the obligation that the data holder shall, upon request from a customer, make available to a data user the customer data for the purposes for which the customer has granted permission to the data user.

FIDA also requests that the data holder shall make customer data available to the data user in a format based on generally recognised standards.

The European standards committee CEN/TC 445 will develop European standards for the customer data access and portability in the insurance sector to implement the requirements of FIDA and also the data portability of GDPR Article 20.

CEN/TC 445 wants to discuss this project with you as interested stakeholder in the insurance sector and invites you to join the standards development which starts in February 2025.

Agenda

Welcome and Motivation

Dr Manuel Reimer, CEN/TC 445 Chair
