

Welcome to the World of Standards

EINBEZIEHUNG VON KONSORTIEN IN NORMUNG UND STANDARDISIERUNG

Workshop „Normung und Standardisierung in Digitaler Agenda“
30. Oktober 2014, BMWi, Berlin

- ETSI today has **+80 partnership agreements**
- Who are our Partners?
 - International Standards Developers: ITU, ISO, IEC, IEEE-SA,...
 - Fora/Consortia: OMA, Continua Health Alliance, SIM Alliance, NFC Forum, ...
 - EU Agencies /int. Organisations : EDA, ERA, EMSA, EASA, EUROCAE, UPU, ICAO...
 - Regional/National Organisations: APT (Asia), CEPT, CEN, CENELEC (Europe), Communications Alliance (Australia), TSDSI (India), SAC, CCSA (China), ATIS, TIA (USA), ARIB; TTC (Japan), TTA (Korea), our NSO's (DKE in Germany)...
 - Trade/Industry Associations: GSMA, DIGITALEUROPE, EBU...
 - Research: ERCIM, ERTICO, SESAR JU, EIT ICT LABS...
- Partnerships have different flavours: **political** and/or **technical** and/or **marketing**
- Main objectives are to:
 - Exchange status on current standards work in common identified areas
 - Exchange findings and know-how via cross participation in each other's meetings
 - Avoid duplication of work
 - Joint work/publications

ETSI partners

International SDOs/Organisations

e.g. UPU, ICAO, UNECE...

Interregional Co-operation

FORA & CONSORTIA

- BBF
- CAB Forum
- CONTINUA Alliance
- DECT Forum
- DLMS
- DMR Association
- DVB
- ESMIG
- Global Platform
- HGI
- IMS Forum
- IMTC
- IPV6 Forum
- NFC Forum
- OGF
- OIPF
- OMA
- SAE
- TTCA
- UMTS Forum
- ...

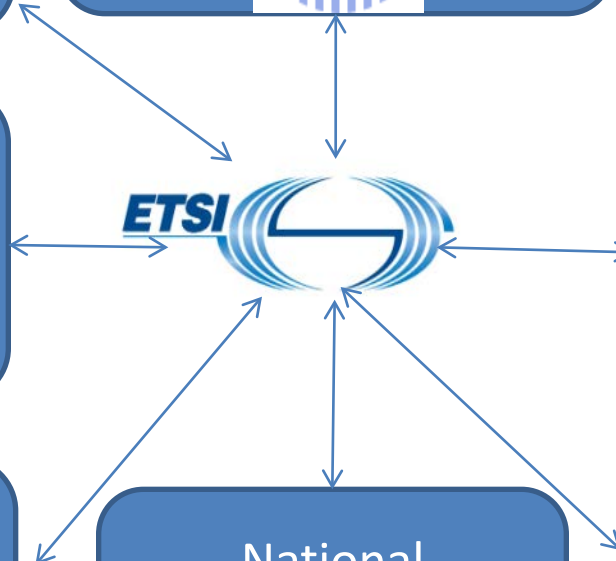

Regional Partners, e.g.

European Partners

National Standards Organisations

ETSI's Partnership Policy Framework

The 4 types of Partnership

From loose to comprehensive...

Letter of Intent (LoI)

- Initial contact, get to know each other

Memorandum of Understanding (MoU)

- Nomination of observers in each others TBs
- Circulation of working documents and drafts on a royalty-free basis
- Mapping of areas of mutual interests identified in Annex

Co-operation Agreement

- Incorporation of text and graphics from the other party into a document
- Jointly production of documents
- Publicly Available Specifications route
- Only possible when IPR policy of potential partner is compatible with ETSI's

Partnership Projects

- Consortium of SDOs from around the globe working on and for a specific topic
- A partnership with a Project Co-ordination function and a Technical Specification function
- Task oriented, ensuring that on completion of the tasks the future of the project is re-evaluated

Publicly Available Specification (PAS)

(Technical specifications from external bodies)

- *ETSI has updated its PAS process to make it usable*
- *PAS submitter must be either a member or a partner organization who has signed a cooperation agreement*
- *Implies check of organization and its IPR policy*
- *ETSI Technical Committee needs to be assigned*
- *Answers to questions like ownership, maintenance, withdrawal need to be answered during the process.*

- *Setup by [EC Communication COM\(2011\) 311 final](#)*
- *Identification of ICT technical specifications eligible for referencing in public procurement acc. Art. 13 of [Regulation \(EU\) 1025/2012 on European Standardisation](#)*
- *Information exchange platform for*
 - *European Commission*
 - *Member States*
 - *European and International Standardisation Organizations*
 - *Fora & consortia*
 - *Societal Stakeholders*
- *Rolling plan for ICT standardization*

Thank you
